

Scope of Work

City of Surprise

Drywell Projects

Overview

The City of Surprise has a current need for two (2) drywells to be provided and installed at the Special Planning Area 1 (SPA1) Water Reclamation Facility (WRF), which is located north of the intersection of 136th Avenue and Peoria Road. It is anticipated that additional drywells may be needed in the future, along with maintenance to existing drywells.

Description

Dual Chamber Drywell - The scope of work for this item is to provide and install a dual-chamber drywell per the City of Surprise (COS) standard detail (Chapter 5 of Engineering Development Standard 2012 or latest update) on an as needed basis; including percolation, final design based on percolation, restoration of the ground surface, rim elevation, excavation, backfill and compaction; disposal of waste off site, mobilization/demobilization, survey, as built, testing.

Drywell Maintenance – The scope of work for this item is to provide maintenance on an as needed basis to existing COS Drywells per the COS standard detail (Chapter 5 of Engineering Development Standard 2012 or latest update).
